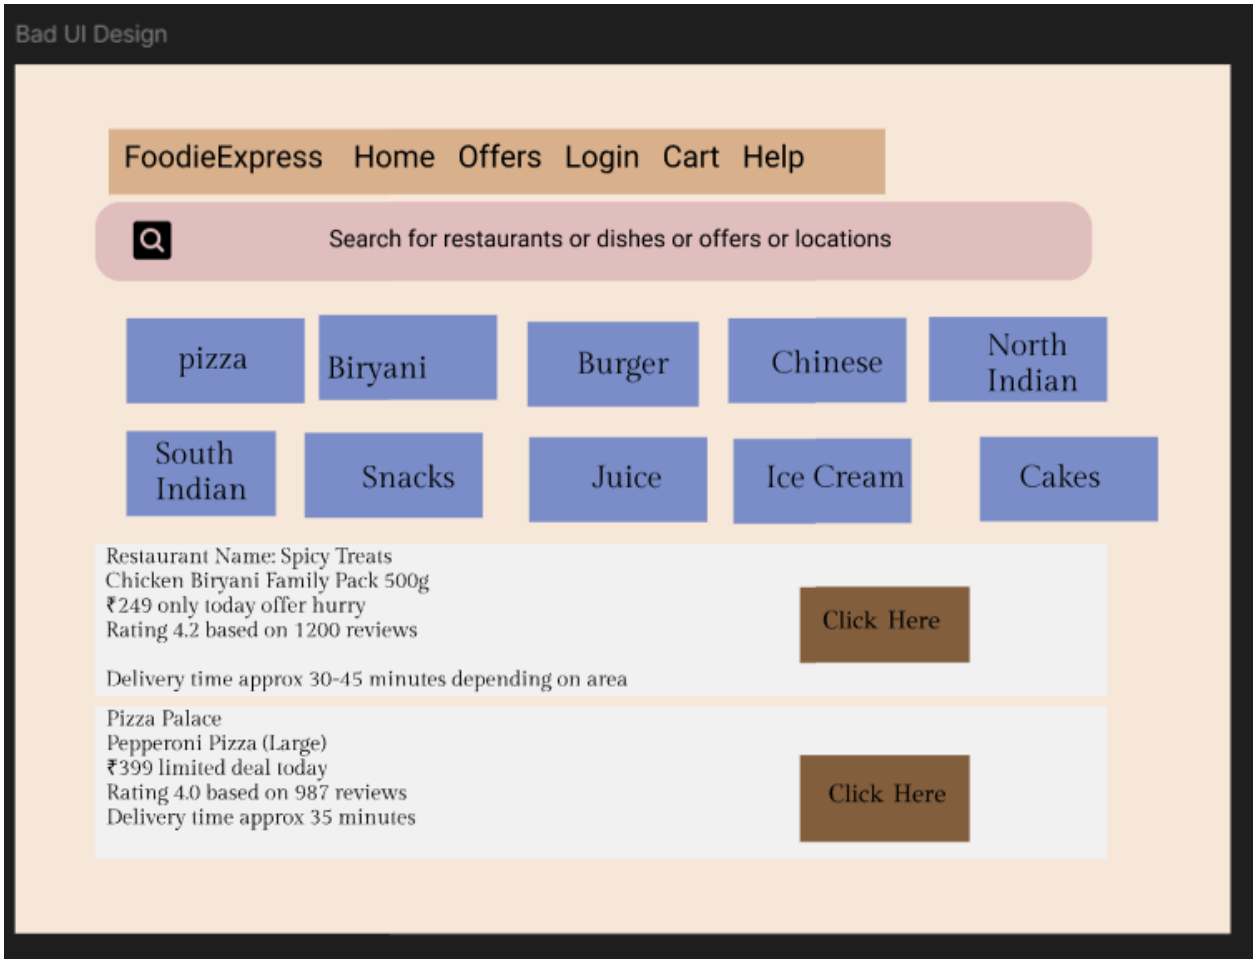
CHEMBETI JAHNAVI

Food Delivery Website

(Bad UI vs Good UI Comparison)

PROTOTYPE LINK:
https://www.figma.com/proto/hERPwrhEiyZwQ9DGwWtYLv/Untitled?node-id=0-1&t=gAKdw91ZDK7JZ3JT-1

➢ BAD UI DESIGN (FOOD DELIVERY WEBSITE)



What the design looks like:

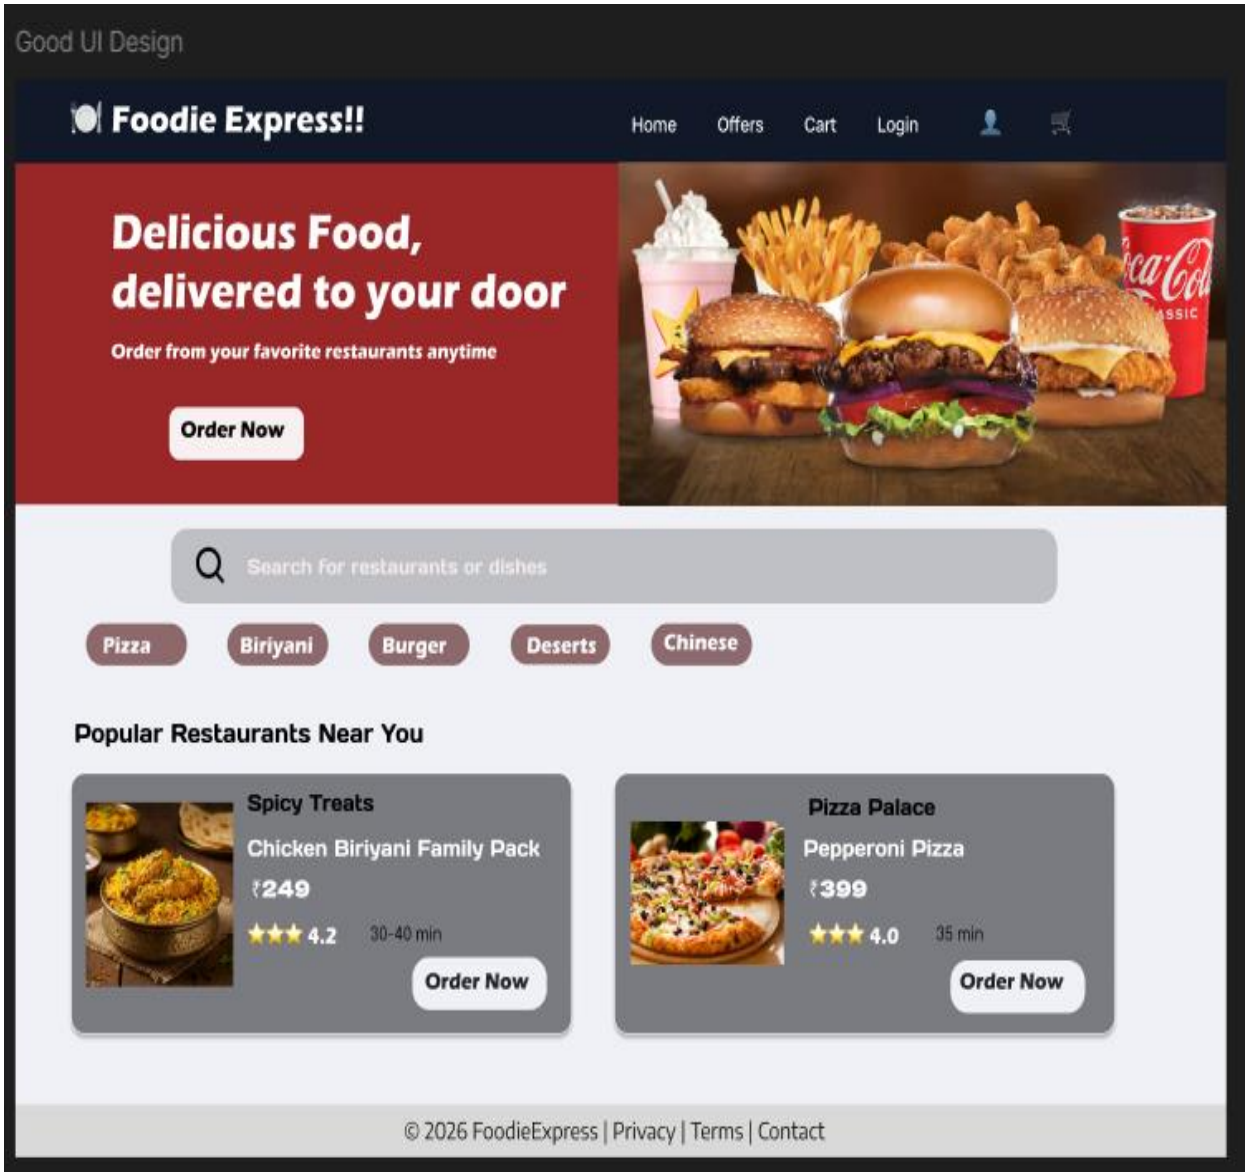
- Crowded top menu with too many items
- Long search text
- Many category buttons shown together
- Restaurant cards contain too much text

- Buttons say “Click Here”
- Many colours used without consistency

<u>Why this is bad:</u>

- Hard to understand which information is important
- Screen looks busy and confusing
- Too many colours reduce visual clarity
- Text is not well organized
- Buttons are unclear about action

➢ GOOD UI DESIGN (FOOD DELIVERY WEBSITE)



What the design looks like:

- Simple top navigation (Home, Offers, Cart, Login)
- Large hero banner with poster image
- Clean search bar with short text
- Limited category chips (Pizza, Biryani, Burger, etc.)

- Clean restaurant cards with proper spacing
- Buttons clearly say “Order Now”

Why this is good:

- Easy to understand and scan
- Clean and professional look
- Consistent colours and fonts
- Important details stand out clearly
- User knows exactly where to click

➢ **KEY DIFFERENCES BETWEEN BAD UI AND GOOD UI**

1. **Navigation Design**

- Bad UI: Too many items in the top menu, which makes navigation confusing
- Good UI: Only important items (Home, Offers, Cart, Login) are shown, making navigation simple and clear.

2. **Layout Style**
   - Bad UI: Elements are placed without proper spacing, making the screen look crowded.
   - Good UI: Proper spacing and alignment are used, giving a clean and organized appearance.
3. **Colour Choice**
   - Bad UI: Many different colours are used randomly, which creates confusion.
   - Good UI: A limited colour palette is used.

- Dark colour for navigation bar → gives professional look
- Red/orange for banner → attracts attention to main message
- Light background → improves readability

4. **Visual Hierarchy**
   - Bad UI: All text looks equally important, so user doesn't know where to look first.
   - Good UI: Headings, buttons, and important information are highlighted, guiding the user's attention.
5. **Button Design**
   - Bad UI: Buttons use unclear text like "Click Here".
   - Good UI: Buttons use clear actions like "Order Now", so the user knows what will happen.
6. **Overall Design Style**
   - Bad UI: Looks outdated and unprofessional.
   - Good UI: Looks modern, clean, and realistic like real food delivery apps
